australia's urban passenger transport journal

Back Issues on DVD

Digital Reproductions of **Transit Australia**
and its predecessors **Tram Tracks** and **Electric Traction**

Volume 1

Tram Tracks – 1946 - 1949

Electric Traction – 1949 - 1970

In May 1946 Australia's first magazine produced solely for tramway enthusiasts was published as "Tram Tracks". Economics forced the publication to evolve to be part of the monthly "Railways in Australia" from September 1949 covering the topics of Tramway, Trolley Bus and Electric Rail. From March 1951 Electric Traction was mooted as The Official Journal of the Australian Electric Traction Association. Electric Traction became a separate publication once more from January 1951 and continued in various looks and sizes until December 1986.

The Journal has taken the following forms;

Tram Tracks – May 1946 to August 1949

Electric Traction – September 1949 to December 1950
(Part of Railways in Australia)

Electric Traction – January 1951 to December 1986

Transit Australia – January 1987 to date

The life of the journal has covered many major significant milestones in the development and evolution of the transport sectors of focus. These events can now be relived in the pages of the back issues presented on this DVD.

Volume 1 covers issues from 1946 to 1970.

Volume 2 will cover 1971 to 1995 and will be released in 2015.

Viewable on Mac or PC operating systems.
